

Aaron Hamilton

Project Manager, Digital Literacy
Digital Leadership Development Program
Thermo Fisher Scientific

Aaron Hamilton is a member of Thermo Fisher Scientific's Digital Leadership Development Program, where he currently serves as a Project Manager on the Digital Literacy team within the company's Enterprise AI Transformation Office. Previously, Aaron completed rotations in Corporate Infrastructure and Security, first as a Security Engineer on the Integrations and Automations team and later as a Business Analyst supporting CIS Service Delivery. His work across these rotations has given him experience leading projects, engaging a variety of stakeholders, and helping launch new solutions.

Beyond his day-to-day role, Aaron co-directs Thermo Fisher's Leadership Development Committee, which organizes professional development and community-building events for all LDPs across the company.

Aaron earned a Bachelor's degree in Software Engineering from the California State University San Marcos. During his undergraduate career, he served as President of the Google Developer Student Club, organizing workshops and events to help students strengthen their technical skills. He also served as a Computer Science tutor at the university's STEM Success Center. Off campus, Aaron worked with Treobytes, a nonprofit that conducts hands-on STEM learning activities with elementary school students in underrepresented communities.

A native of San Marcos, Aaron enjoys gaming with friends and playing chess. He is also an avid San Diego Padres fan.
