

Meron Mathias

Vice President
Corporate Social Responsibility & Sustainability
Thermo Fisher Scientific

Meron Mathias leads corporate social responsibility (CSR) for Thermo Fisher Scientific, the world leader in serving science. In this role, she partners across the company to advance environmental, social and governance (ESG) initiatives that drive positive business and societal outcomes.

Meron's career has spanned scientific research, international development and corporate sustainability, with experience working across the private, public and social sectors. Throughout her career, she has brought together organizations with different perspectives to build partnerships, tackle complex challenges and deliver measurable results.

Since joining Thermo Fisher in 2020, Meron has helped shape the company's CSR agenda, advance its climate strategy and sustainable finance efforts, and strengthen ESG transparency and stakeholder trust. She also directs the Thermo Fisher Scientific Foundation for Science, which invests in health equity and the future of the STEM workforce.

Meron began her career as a scientist and holds an MBA from George Mason University and a Bachelor of Science from William & Mary. She is passionate about harnessing the power of science, technology, and innovation to create a more sustainable and equitable world.
