

Virtual Time Capsule

Thank you for participating in our first Broadcom MASTERS Virtual Public Day! We hope you had fun while learning about the student scientists' STEM projects and their backgrounds. After you answer the following questions, set some STEM goals for yourself. Your last step will be to gather items to create a virtual time capsule to open in one year.

Questions for Now:

1. What did you enjoy the most about Broadcom MASTERS Virtual Public Day?
2. Which of the student scientists' projects in the exhibition hall and which of the booths in the STEM experiential hall did you find most interesting? Pick two of each.
3. What goal you want to achieve in your science class this year? For example, do you want to learn about a new STEM topic this year or maybe better on your next test?
4. What STEM-related goal do you have outside of the classroom? For example, do you want to plant some trees in your area or e-mail a scientist you admire?

Questions Upon Opening Your Virtual Time Capsule in 2021:

1. Did you achieve your goals or have you modified them since then?
2. Create a new STEM-related goal to achieve in the next year.

Virtual Time Capsule

Gather items from 2020 Virtual Broadcom MASTERS Public Day and put them together to create a virtual time capsule of your experience. Pick at least four of the following items — or come up with your own ideas — to include in your time capsule. Store these items in a folder or drive that you'll have access to in one year. Set an electronic reminder for yourself for a year from now to open your time capsule.

○ This completed worksheet

Screenshot of the virtual convention center

Name of your favorite student scientist interviewee and their project ○

Written profile of a Broadcom MASTERS student scientist based on journalist notebook questions ○

○ Completed BINGO board

Favorite part of the STEM experiential hall as noted in your experiences planner ○

Visual representation of one of the STEM aspirations mentioned in your graphic organizer (Possible ideas include a logo of university you want to attend or a drawing of something you want to do as a research project.) ○
