

THE SOCIETY FOR SCIENCE & THE PUBLIC INVITES YOU TO BE A PART OF THE WORLD'S PREMIERE GLOBAL SCIENCE COMPETITION.

The Intel International Science and Engineering Fair

Education Outreach Day Program

May 16, 2019 – The *Phoenix Convention Center* – Phoenix, AZ

8:00 AM - 3:00 PM

The **Education Outreach Day Program** will take place on Thursday, May 16, giving thousands of middle & high school students and teachers from across the great state of Arizona, a chance to participate in a full day of hands-on science programming. The program encourages students to think critically, work together and get excited about science.

Organizations participating in the Education Outreach Day Program will be able to introduce their organization -- including career and internship opportunities -- to a unique audience of Intel ISEF visitors and attendees. In 2019, we anticipate over 3,000 local students and their teachers will participate in the program with an estimated 10,000 science enthusiasts in attendance throughout the week.

HOW TO GET INVOLVED

Your organization can be a part of the Education Outreach Day Program in several different ways. We offer the following options to potentially partner with us at the Intel International Science & Engineering Fair:

Classroom Program

Intel ISEF can accommodate classroom experiences for groups between 15 and 200 students. Classroom programs (including any presentations or performances) must be able to accommodate a minimum of 15 students per session. Preference is given for hands-on programs that last less than one hour and can engage in multiple sessions (up to four).

Mobile Classrooms, Labs & Exhibit Booths*

Intel ISEF can accommodate mobile classrooms or labs in our large exhibit hall space. These interactive experiences should either serve a large capacity of visitors on a rolling basis, or accommodate a minimum of 15 participants per session for multiple sessions. For other interactive displays or informational programming, the exhibit hall will also have free 10' x 10' or 20' x 10' booths available for interested exhibitors. There is a limited budget for fee-based programming, and preference will be given to programs with little or no cost.

To sign up for a chance to participate, please go to <https://societyforscience.tfaforms.net/240>

If you have any questions or need additional information, please contact **Victor Hall** at the Society for Science & the Public.
