Dear Finalists,

Congratulations on being a 2024 Regeneron International Science and Engineering Fair (ISEF) finalist. We hope your ISEF experience lives up to your expectations of this distinguished competition. Many brilliant and important science, technology, engineering and math (STEM) leaders have passed through ISEF's halls, and now you are among this next generation of inventors, entrepreneurs and educators. We are proud of all that you have accomplished.

Regeneron is honored to sponsor ISEF, shining a light on the world's top young science talent and the critical role you and your science can play in addressing our world's most important challenges. Supporting ISEF is a natural extension of Regeneron's mission to use science to improve human health.

We both got our start with science research in high school, as part of the then Westinghouse Science Talent Search (STS), now known as the Regeneron STS, the oldest science and math competition for high school seniors in the United States.

It was this positive experience that helped set us on our paths and gave us the confidence to become physician-scientists and entrepreneurs. Since founding our biotechnology company more than 35 years ago, we have worked to turn groundbreaking science into medicines that improve human lives, including our treatments for blindness-causing diseases, numerous cancers, allergic diseases and Ebola. In this spirit, we are committed to supporting the young scientists who will keep improving our world and public health for generations to come. We believe that you will be making the important discoveries of tomorrow.

We look forward to learning about your projects during ISEF and watching as you spend the week celebrating innovation, competing for top honors and making friends.

At Regeneron, we've built a culture that shares much of this energy—one of curiosity, scientific excellence and camaraderie. Our dream was to create a company where scientists are the heroes. Your work at ISEF helps extend this dream even further: you are our heroes, and we can't wait to see what you do next to improve the world! Congratulations once again, and good luck in all your future endeavors.

Sincerely,

Leonard S. Schleifer, MD, PhD

Congratulations on being a finalist at the Regeneron International Science and Engineering Fair 2024!

Society for Science is so excited to be back in Los Angeles! While you are here, I encourage you to take advantage of everything that Regeneron ISEF has to offer—Pin Exchange, College & Career Fair and the various symposia to expand your horizons.

Tens of millions of students compete in science fairs every year around the globe, with nearly 2,000 invited to compete at Regeneron ISEF. Look around you and know that you are among the top student scientists and engineers in the world. That is the real prize—connecting with your fellow finalists. Many alumni stay in touch with one another, developing not only lifelong friendships, but also collaborating professionally later in life.

You are truly among an elite group. Your research has the power to change lives. I look forward to meeting you this week. I am excited to visit your booths and hear more about research. When I was in high school, I participated in science fairs; I understand the long nights, hard work and intensity that went into all of the projects on display here this week. Please enjoy this week and celebrate your accomplishments. I also encourage you to thank the people who helped you get here—your teachers, parents and mentors who supported you through the years. It takes a true community to develop talent like yours!

The Society for Science would like to thank all our sponsors, including our title sponsor, Regeneron; the judges and volunteers who make this week possible; and the science fair directors around the world who make up our affiliated fair network.

I hope all of you have a wonderful time at Regeneron ISEF 2024, and we hope to see you all next year in Columbus, Ohio, for Regeneron ISEF 2025!

Only my best,

About Regeneron ISEF

The Regeneron International Science and Engineering Fair (Regeneron ISEF), a program of Society for Science for over 70 years, is the world's largest global science competition for high school students. Through an international network of local, regional and national science fairs, millions of students are encouraged to explore their passion for scientific inquiry. Each spring, a group of these students is selected as Regeneron ISEF finalists and offered the opportunity to compete for nearly \$9 million in awards and scholarships.

In 2019, Regeneron became the title sponsor of ISEF to help reward and celebrate the best and brightest young minds globally and encourage them to pursue careers in STEM as a way to positively impact the world. Regeneron ISEF is supported by a community of additional sponsors, including Akamai Foundation, Alfred E. Mann Charities, Aramco, Caltech, Google.org, Gordon and Betty Moore Foundation, Howmet Aerospace Foundation, HP, Jacobs, King Abdulaziz & his Companions Foundation for Giftedness and Creativity, Microsoft, National Geographic Society, Richard F. Caris Charitable Trust II, Rise, an initiative of Schmidt Futures and the Rhodes Trust, Schattner Foundation, Siemens Energy, Annenberg Foundation, Ballmer Group, Broadcom Foundation, Cescio Linguistic Services, Conrad N. Hilton Foundation, Edison International, Insaco, Oracle Academy, The Eli and Edythe Broad Foundation, The Ralph M. Parsons Foundation and US Army ROTC.

ISEF alumni have gone on to have world-changing careers in science and engineering and have earned some of the most esteemed honors. Our alumni include National Medal of Science recipients, MacArthur Foundation Fellows, National Academy of Sciences and National Academy of Engineering inductees and a range of entrepreneurs.

Grand Awards 2024

GRAND AWARDS AT REGENERON ISEF 2024

George D. Yancopoulos Innovator Award: \$75,000

The George D. Yancopoulos Innovator Award recognizes the Best of the Best among the outstanding students from around the world who participate in Regeneron ISEF. The winning project will be selected on the basis of outstanding and innovative research, as well as on the potential impact of the work — in the field and on the world at large.

Regeneron Young Scientist Awards: \$50,000

This award will be presented to two projects that are best able to demonstrate their commitment to innovation in tackling challenging scientific questions, using authentic research practices and creating solutions to the problems of tomorrow.

Gordon E. Moore Award for Positive Outcomes for Future Generations: \$50,000

This award will be presented to the project that best demonstrates the founding principle of the Gordon and Betty Moore Foundation to make an enduring difference for future generations through rigorous scientific inquiry and a passion for discovery and invention.

Craig R. Barrett Award for Innovation: \$10,000

This award will be presented to the project that best demonstrates an innovation in Science, Technology, Engineering and Math, recognizing that research and innovation are dependent on the integration of these disciplines, as well as the impact they collectively have on our everyday lives.

Peggy Scripps Award for Science Communication: \$10,000

This award will be presented to the project that is best able to communicate their project to the lay public, explaining both the science and its potential impact on society.

H. Robert Horvitz Prize for Fundamental Research: \$10,000

This award will be presented to the project that represents the best in fundamental research that furthers our understanding of science and/or mathematics and promotes the understanding of natural phenomena without clearly defined applications towards processes or products in mind.

Dudley R. Herschbach SIYSS Award

This award is a multi-disciplinary seminar inspiring youth to science, highlighting some of the most remarkable achievements by young scientists around the world. The award is named for Dudley R. Herschbach, Harvard Professor Emeritus and 1986 Nobel Laureate in Chemistry. He is Board Chairman Emeritus of the Society for Science. The winning finalists will receive an all-expense paid trip to attend the Stockholm International Youth Science Seminar during Nobel Week in Stockholm, Sweden.

EU Contest for Young Scientists Award

This award will be presented to two projects that will represent Regeneron ISEF at the EU Contest for Young Scientists to be held in Katowice, Poland, September 9–14, 2024.

Society for Science is a champion for science, dedicated to promoting the understanding and appreciation of science and the vital role it plays in human advancement. Established in 1921, Society for Science is best known for its award-winning journalism through Science News and Science News Explores, its world-class science research competitions for students, including the Regeneron Science Talent Search, the Regeneron International Science and Engineering Fair and the Thermo Fisher Scientific Junior Innovators Challenge, and its outreach and equity programming that seeks to ensure that all students have an opportunity to pursue a career in STEM.

A 501(c)(3) membership organization, Society for Science is committed to inform, educate and inspire.

REGENERON®

Regeneron is a leading biotechnology company that invents, develops and commercializes life-transforming medicines for people with serious diseases. Founded and led for nearly 35 years by physician-scientists, Regeneron's unique ability to repeatedly and consistently translate science into medicine has led to numerous FDA-approved treatments and product candidates in development, almost all of which were homegrown in Regeneron's laboratories. Regeneron's medicines and pipeline are designed to help patients with eye diseases, allergic and inflammatory diseases, cancer, cardiovascular and metabolic diseases, pain, hematologic conditions, infectious diseases and rare diseases.

Regeneron's long-standing commitment to corporate responsibility is crucial to achieving our mission of delivering vital medicines to patients. We leverage the unique knowledge and expertise within our company to focus on three goals: improving the lives of people with serious diseases, fostering a culture of integrity and excellence and building sustainable communities. Our most significant philanthropic commitments focus on fostering future scientific leaders through STEM education outreach and equity, including the Regeneron Science Talent Search and Regeneron International Science and Engineering Fair. Regeneron is proud to be included on the Dow Jones Sustainability World Index, the Civic 50 list of the most "community-minded" companies in the United States and *Newsweek* America's Most Responsible Companies.
