

Barry Williams

Global Product Manager, Life Sciences
Solutions
Thermo Fisher Scientific

As a global product manager at Thermo Fisher Scientific, Barry develops and implements global product strategies for Research Use Only Recombinant Proteins. Barry leads with clarity and empathy, aligning technical execution with market needs, competitive insights, and user impact. His engineering background provides credibility in technical discussions, while his product expertise enables him to define roadmaps, articulate vision, and prioritize effectively.

Barry began his career as a field service engineer, resolving complex technical issues and optimizing performance for advanced lab systems. His early focus on problem-solving and process improvement evolved into leadership across full project lifecycles. Transitioning naturally into product management, he found strength in bridging technical depth with strategic thinking.

Barry's approach to mentoring future STEM professionals combines his real-world product experience with a passion for helping young innovators translate technical skills into broader impact.

Barry earned his Bachelor of Science Degree in Biomedical Engineering.
