

Tamara Rychkov

Commercial Finance Analyst, Clinical
Research
Finance Leadership Development Program
Thermo Fisher Scientific

Tamara is a member of Thermo Fisher Scientific's Finance Leadership Development Program, where she currently supports the Commercial Finance team for the Patient Advisory Service Division of Thermo Fisher's Clinical Research business. Previously, Tamara completed rotations in Group Financial Planning & Analysis for Life Sciences Solutions, and in Operations Finance for Genetic Sciences.

Tamara earned dual bachelor's degrees in Economics and Microbial Biology from the University of California, Berkeley, with a concentration in Biotechnology. During her undergraduate career, Tamara researched the development of sustainable vaccine adjuvants by cultivating Chilean soapbark trees and analyzing saponin compounds. She also completed an internship with Thermo Fisher's Bioproduction Group, supporting their marketing strategy in the Greater China region.

Outside of work, Tamara runs the nonprofit Rebuild Ukraine Now, which she founded with her family to provide medical supplies and other aid to communities across Ukraine affected by conflict.

In her free time, Tamara enjoys learning new languages, reading, and traveling.
